

XOR

XOR is a cheap way to encrypt data. You can learn more about that [Here](#).

The following python code can get the flag for this challenge.

```
key = 'A';
encrypted =
"\x0c\x05\x02\x15\x07:\x19q\x13\x1ept\x1eu\x1e\rq\x06p\x02\x1
e\x06uvr<";
decrypted = ''.join([chr(ord(x) ^ ord(key)) for x in
encrypted]);
print(decrypted);
```
